PROFESSIONAL SUMMARY

I am a dedicated Freelance Webflow Designer/Developer specializing in creating highly customizable, responsive, and visually compelling websites. With a strong foundation in HTML, CSS, and JavaScript, gained through comprehensive training and hands-on experience, I bring both creativity and technical expertise to each project. My background, overcoming the challenges of being deaf from birth, has instilled in me a unique perspective and problem-solving ability that I apply to deliver high-quality, user-focused web solutions. Eager to contribute my skills and enthusiasm to a dynamic team while continuously learning and growing in a professional environment.

PROJECT WORK

- **GYM WEBSITE – MY FITNESS** Dec 2023
Role: Lead Webflow Developer
Details: Designed and developed a fully responsive and visually engaging concept website for a fictional fitness center. The site includes interactive elements such as a dynamic class schedule, client testimonials, and custom animations to simulate real-world engagement.

On-page SEO best practices were applied to reflect visibility-focused strategies in portfolio projects.

Outcome: Created as a portfolio project to demonstrate design proficiency in service-based industries, with a focus on enhancing user experience, accessibility, and business conversion potential.

- **COFFEE SHOP WEBSITE** May 2024

Role: Webflow Designer

Details: Designed and developed a fully functional concept website for a fictional local coffee shop, featuring a modern layout with a cozy aesthetic. The site includes an interactive menu, mock online ordering system, and integrated social media links. The design emphasizes intuitive navigation, responsiveness, and accessibility to simulate a real-world user experience.

Outcome: Completed as a portfolio project to demonstrate end-to-end design and development skills for small business websites, with a focus on functionality, visual appeal, and customer engagement.

- **AI X+ WEBSITE** Jan 2025

Role: Webflow Designer

Details: Conceptually designed and developed a sleek, modern landing page for a fictional AI software brand to showcase smart technology solutions. The website features clean UI components, interactive scroll animations, and a fully responsive layout optimized for performance and visual impact.

Outcome: Created as a portfolio project to demonstrate expertise in high-impact landing page design, focusing on clarity, engagement, and responsiveness.

- **NASA WEBSITE** March 2025

Role: Webflow Designer

Details: Conceptualized, designed, and developed a visually engaging and responsive website as a creative exercise inspired by NASA's brand identity. Built using Webflow, the site features a clean layout, interactive elements, and seamless performance across devices.

Outcome: Developed as a portfolio project to demonstrate my skills in responsive design, accessibility, and brand-oriented UI/UX thinking.
