PROFESSIONAL SUMMARY

I am a dedicated Freelance Front-End Web Development specializing in creating highly customizable, responsive, and visually compelling websites. With a strong foundation in HTML, CSS, and JavaScript, gained through comprehensive training and hands-on experience, I bring both creativity and technical expertise to each project. My background, overcoming the challenges of being deaf from birth, has instilled in me a unique perspective and problem-solving ability that I apply to deliver high-quality, user-focused web solutions. Eager to contribute my skills and enthusiasm to a dynamic team while continuously learning and growing in a professional environment.

PROJECT WORK

- **Vitala – Premium Wellness Platform** AUG 2026
Role: Frontend Developer
Details: Designed and developed a modern, fully responsive wellness platform using React.js, Tailwind CSS, and Framer Motion. Built interactive sections focused on fitness goals, nutrition tracking, daily habits, recovery monitoring, sleep, steps, calories, and hydration. Implemented smooth animations, reusable components, responsive layouts, and a clean premium interface optimized for desktop and mobile users.
Outcome: Created a polished portfolio project demonstrating frontend development, responsive UI design, component-based React architecture, animation, and user-focused web experiences.

- Arrive Trip – Travel Website** JUN 2026
Role: Frontend Developer
Details: Developed a modern and responsive travel website using React.js, JavaScript, and Tailwind CSS. Created an engaging travel-focused interface with structured sections, responsive layouts, reusable components, and intuitive navigation. Worked across frontend and backend functionality to build a complete project experience, with attention to usability, performance, and consistent design across different screen sizes.
Outcome: Built a complete travel project demonstrating frontend development, responsive UI implementation, component-based architecture, and full project deployment using Vercel.
Link: <https://arrive-trip.vercel.app/>
- Spotify Clone** MAY 2026
Role: Frontend Developer
Details: Developed a responsive music streaming interface inspired by modern music platforms using React.js, JavaScript, and Tailwind CSS. Built reusable components for navigation, music-focused sections, playlists, and content presentation while maintaining a clean and responsive layout. Focused on creating a smooth user interface, consistent component structure, and an experience that works effectively across desktop and mobile screen sizes.
Outcome: Created a functional frontend portfolio project demonstrating React.js development, responsive design, reusable components, modern UI implementation, and deployment with Vercel.
